

## PARQUET SOLUTIONS

Crafted from selected woods and finished to perfection, our parquet brings nature's warmth underfoot.

### DESIGN

Natural textures meet advanced technology. Each plank recreates the organic feel of wood through a multi-layer structure designed for both beauty and endurance. The rigid mineral core ensures a seamless visual flow and stability across all environments — from living rooms to high-traffic commercial interiors.

**Surface finish:** matte or natural wood grain

**Click system:** floating installation (locking joint)

**Edge detail:** micro-beveled

### SPECIFICATION

### DETAIL

Product Type	SPC (Stone Plastic Composite) Flooring
Total Thickness	4.0 – 6.0 mm
Wear Layer	0.3 – 0.55 mm
Dimensions	1220 × 180 mm (typical)
Use Classification	23 / 33 / 42 — heavy residential / heavy commercial / light industrial
Fire Reaction	Bfl-s1 (EN 13501-1)
Slip Resistance	DS (EN 13893)
Dimensional Stability	≤ 0.15% (EN ISO 23999)
Impact Resistance	≥ 800 mm (EN 13329)
Water Resistance	100% waterproof
Underfloor Heating	Compatible up to 27°C
Emission Class (VOC)	< 0.5 mg/m <sup>3</sup> — TÜV Rheinland Certified

## SUSTAINABILITY

Designed for longevity, manufactured with responsibility. SPC flooring holds verified environmental credentials under the International EPD® System, conforming to ISO 14025 and EN 15804+A2:2019 standards. FloorScore® and UKCA certifications ensure indoor air quality and European compliance.

Environmental Product Declarations: EPD-IES-0016872 / EPD-IES-0016909

Certifications: EPD®, FloorScore®, UKCA, TÜV Rheinland VOC Tested

## KEY ADVANTAGES

- Waterproof and highly durable core
- Easy installation with click-lock system
- Minimal maintenance and superior stain resistance
- Suitable for underfloor heating
- Certified low VOC and phthalate-free
- Full EPD and FloorScore compliance
